Kitchen and Power Room Remodel

The original addition of the kitchen was not structurally sound. The structure's foundation was reinforced and framing reworked. The Kitchen is very modern with white cabinets and white tile floor and walnut accents. Cambria is used on the countertops, the island includes two waterfall ends, along with a full height Cambria backsplash. The Thermador refrigerator and freezer towers are disguised behind flush cabinet panels. The warming drawer is also paneled and seamlessly disguised as a drawer. The Powder Room is "dark and moody" with black tile walls and gold mosaic tile, with a floating vanity and wall mounted faucet.
