

Kitchen Renovation

Home to a vibrant young professional and her beloved canine companion, this 1970's Upper Arlington ranch was completely reimagined. Curb appeal was updated by reconfiguring the front elevation and replacing windows and decorative trim. The Kitchen and Dining Room were flipped by removing the dividing walls, creating a more natural flow. From the Chef's Kitchen and open Dining Room with a serving area and dry bar to the restored original terrazzo and hardwood floors, the homeowner has everything she needs to entertain a crowd.
